

Cannon Technologies

Cannon Technologies is proud to announce the arrival of its state-of-the-art, local or remote management and alarm system, for controlling:

- Personnel Access;
- Environmental and Climatic Conditions;
- Power Management, Monitoring & Recording; and
- PC Recovery (Globally).

Easy to configure and manage, but highly versatile and adaptable, allowing local operation or remote control via a network, Cannon Guard offers both electronic key pad control and remote control of multiple sites, with Cannon View software providing extensive system management.

A key override or hand-held master controller is available for situations where the electrical power supply is disrupted. The swing handle lock can be single point or multi point equipped. Ruggedised stainless steel versions are available for outdoor or vandal-prone installations.

Cannon Guard is surprisingly affordable and perfect for the protection of sensitive or expensive equipment, allowing easy control for third party access.

One lock to thousands of locks; one site to thousands of sites; all controllable from the one location.

Communication Technology

COMMUNICATION TECHNOLOGY is the long-established 'public address' division of SCARECROW BIO-ACOUSTIC SYSTEMS, Europe's leader in the science of bio-acoustic bird control for dispersal from areas where they cause public nuisance, or compromise health.

COMMUNICATION TECHNOLOGY produce paging microphones that are very user friendly and can even be operated in noisy environments with complete announcement clarity using DSP, the latest digital sound processing technology which, electronically removes most, if not all, background noise.

A further advance in making passenger announcements even simpler is the COMMUNICATION TECHNOLOGY Store 'n' Forward product, which can automatically re-broadcast live announcements and/or broadcast from a built-in voice store, ideal for busy transport Termini. Again, being desk-based in format, these paging microphones present no challenge to their users; just press a button to speak or to play a stored message.

Express Medicals

Express Medicals Ltd is an established supplier of occupational health and screening services within the railway sector. The company

provides a complete occupational health service to a number of rail infrastructure companies.

Alongside its nationwide service in respect of Network Rail medicals and drug and alcohol tests, Express Medicals offers a full service for client companies working on the London Underground system. As suppliers to Metronet and Trans4M, we offer Track Accustomed, Track Competent and Protection Master medicals plus a 24-hour drug and alcohol sample collection service.

We are excited to announce the opening of our new, dedicated railway medicine centre on 4 July. Located adjacent to our current premises in London SE16, the centre will be eminently convenient for clients. Transport connections are excellent with the centre being just minutes away from Canada Water, Surrey Quays, Bermondsey and Rotherhithe tube stations. London Bridge and Waterloo mainline stations are a 10 minute journey by bus.

Appointments will be available within 24 hours and same-day bookings will usually be possible. Turnaround times for documentation and drug and alcohol results will be rapid. Clients can be assured of a very professional service with secure, electronic record-keeping. Clinical services are overseen by consultant occupational physicians who have a special interest in railway medicine. All nursing staff are trained to be totally familiar with London Underground and Network Rail protocols.

Express Medicals has BS EN ISO 9001:2000 (Lloyds Register approved) and is proud to have achieved the Investors in People accreditation. We are Link-up approved for Network Rail services.

● For details of our services and/or to organise a visit, please contact Suzanne Osborne or Daniel Verster on 020 7394 1788.

TAS

TAS publishes a range of acclaimed reports on the performance of UK public transport, including Rail Industry Monitor, Bus Industry Monitor and Rapid Transit Monitor. The 8th edition of Rail Industry Monitor has just been published, and contains over 470 pages of essential data about the industry, arranged in five volumes – The Market for Rail Services, Public Sector Spending & Support, Vehicles and Investment, The Passenger Railway and The Freight Railway. You can buy individual volumes or the whole report as a hard copy or on CD-Rom.

The TAS Partnership Ltd is the UK's leading specialist public transport consultancy, now with over 23 staff plus an annual turnover in excess of £1m. Our clients include national and local government, all the major transport groups and other transport operators.

Forgetrack

PRIMAVERA ENTERPRISE PROJECT PORTFOLIO MANAGEMENT SEMINARS
Come and explore the benefits of enterprise Project Portfolio Management (PPM) and Risk Management for FREE.

During May, June and July Primavera Solution Provider ForgeTrack, in partnership with Pertmaster, is running a series of FREE half day seminars designed specifically for directors, project managers and planners who are looking at what benefits PPM and Risk Management systems could bring to their business.

Seminars are being run in the following locations: Bristol, Birmingham, Derby, Edinburgh, Glasgow, London, Maidstone, Manchester, Stevenage, Taunton and York. Although some of the seminars are dedicated to specific industries, namely: Transportation, Rail, Aerospace & Defence and Utilities, they are open to all.

● To find out about a Seminar in your area please email seminars@forgetrack.co.uk or contact ForgeTrack on 01992 500900 for further information.

Nexus

Nexus is committed to helping organisations to achieve the goal of a competent workforce,

whether by providing consultancy to develop a competence model or implement and integrate NVQs, by supporting the development of staff at all levels to fulfil assessor, verifier, training, coaching and mentoring roles, or by offering executive coaching. Nexus believes that where a competence management system is mandated it should also work to bring real business benefits to the organisation.

Nexus also works at an industry-wide level. For example, we are currently carrying out a project with the standard setting body and regulators in the rail industry at the beginning of a process to harmonise National Occupational Standards and competence standards required for the performance of safety critical work, and are also the sole supplier of assessor training to Network Rail.

Nexus has added to its services with rail specific training, offering the following training and qualifications:

- Assessor training (A1, A2, L20)
- Verifier Training (V1)
- Train the Trainer (L9, L10, L11, L13) – approved by RTAS
- Coaching/mentoring (L12)
- Management development
- ILM Introductory, Certificate and Diploma for Team Leaders and Managers
- Management NVQ
- Learning and Development NVQ
- IOSH Managing Safely
- T. & R. S. maintenance
- Designated Person
- Rail Incident Management.

Nexus is City & Guilds and Link-up approved.
